Contents

1.	EXECUTIVE SUMMARY	1-1
1.1.	INTRODUCTION	1-1
1.2.	THE STELLARATOR CONCEPT	1-2
1.3.	SCOPE OF THE STUDY	1-3
1.4.	REFERENCE CONFIGURATION	1-4
1.5.	TECHNICAL ASSESSMENT	1-9
1.6.	SUMMARY AND CONCLUSIONS	1-10
1.7.	ORGANIZATION OF THE REPORT	1-10
	REFERENCES	1-11
2.	STELLARATOR PHYSICS	2-1
2.1.	INTRODUCTION	2-1
2.2.	THE MHH CONFIGURATION	2-13
2.3.	MHD EQUILIBRIUM AND STABILITY	2-23
2.4.	TRANSPORT	2-30
2.5.	PARTICLE AND HEAT REMOVAL	2-41
2.6.	IMPROVEMENTS TO THE MHH PHYSICS BASIS	2-55
	REFERENCES	2-62
3.	SYSTEMS ANALYSIS	3-1
3.1.	INTRODUCTION	3-1
3.2.	MODELS AND METHODS	3-2
3.3.	DESIGN POINT SELECTION	3-37
3.4.	PARAMETRICS AND SENSITIVITIES	3-43
3.5.	CONCLUSIONS	3-51
	REFERENCES	3-52

4.	CONCEPTUAL DESIGN OF SUPERCONDUCTING MAGNET COILS .	4-1
4.1.	INTRODUCTION	4-1
4.2.	DESIGN OF MAGNET INTERNALS	4-3
4.3.	DESIGN ANALYSIS	4-16
4.4.	SUMMARY AND CONCLUSIONS	4-46
	REFERENCES	4-50
5.	FUSION POWER CORE	5-1
5.1.	INTRODUCTION	5-1
5.2.	POWER CORE DESIGN	5-3
5.3.	BLANKET NEUTRONICS AND SHIELD DESIGN	5-15
5.4.	CONFIGURATION AND MAINTENANCE	5-44
5.5.	SUMMARY AND CONCLUSIONS	5-81
	REFERENCES	5-84
6.	SAFETY AND ENVIRONMENT	6-1
6.1.	INTRODUCTION	6-1
6.2.	SAFETY PRECAUTIONS WITH LITHIUM	6-2
6.3.	ACCIDENTAL RELEASE OF RADIOISOTOPES	6-3
6.4.	VANADIUM RELEASE	6-9
6.5.	WASTE DISPOSAL	6-10
6.6.	ACTIVATION ANALYSES	6-11
6.7.	LOSS OF COOLANT ACCIDENT ANALYSIS	6-18
6.8.	SUMMARY	6-32
	REFERENCES	6-34

ACKNOWLEDGMENTS

Section 3 reports work supported by the U.S. Department of Energy, Office of Fusion Energy Sciences, under contracts DE-AC05-84OR21400 with Lockheed Martin Energy Systems, Inc., DE-AC02-76-CHO-3073 with Princeton University, DE-FG02-93ER54222 with the University of Wisconsin, DE-FG02-86ER53223 with New York University, and DE-FG02-93ER25160, and by N.S.F. Grants DMS-8922085 and DMS-900002P. Some of the material in this chapter was provided by collaborators at the Max-Planck-Institut für Plasmaphysik in Garching, Germany: E. Harmeyer, J. Kißlinger, P. Merkel, F. Rau, and H. Wobig. We are also indebted to A. H. Boozer, F. Bauer, H. Gardner, K. Gulec, S. P. Hirshman, D. A. Monticello, and S. L. Painter for helpful discussions and other contributions.

Section 4 reports work performed in part at Los Alamos National Laboratory, supported by the U.S. Department of Energy, Office of Fusion Energy Sciences, under Contract No. W-7405-ENG-36 and later at the University of California, San Deigo. C. Bathke and K. Werley, both of LANL, contributed to the development of the tokamak version of the ARIES Systems Code (ASC) and to its documentation.

Section 5 summarizes work performed from September 23, 1994 to November 30, 1994 to complete the Magnet Design Task portion of the Stellarator Power Plant Study. The work described in this section builds upon and extends the results of an earlier, related effort documented in a preliminary report, "Design Feasibility, Structural Support, and Fabrication Cost Analyses of Superconducting Magnets for a Stellarator Power Plant," Westinghouse STC Document 94-9TM4-ITRFS-R1, dated July 6, 1994. This work was supported by Raytheon Engineers and Constructors, Inc., under Purchase Order No. NAT SP F-10W. Mr. David Johnson is acknowledged for performing magnetic-field calculations for the coil-grading analysis.

The ARIES program is supported by the U.S. DOE, Office of Fusion Energy Sciences, at the University of California, Los Angeles under grant DE-FG03-86ER52126; at the University of California, San Diego under grant DE-AC03-95ER-54299; at Argonne National Laboratory under contract W-31-109-ENG-38; at General Atomics under contract DE-AC03-89ER52153; at Idaho National Engineering Laboratory under contract DE-AC07-76ID01570; at Los Alamos National Laboratory, which is operated by the University of California for the U.S. DOE under contract W-7405-ENG-36.

The contributions of J. Hanson (Auburn University), C. P. C. Wong (General Atomics), R. A. Krakowski (LANL), R. Fowler (ORNL), A. Georgiyevskiy and R. Scully (Raytheon Engineers and Constructors) are gratefully acknowledged.

IN MEMORIAM

Lyman Siptzer, Jr.
